

# Job opening:

## Certified Metal worker/Welder TIG, MIG/MAG

As a certified welder you manufacture and assemble various metal constructions. You work independently or with the help of a pipe fitter based on a drawing (ISO) and product information. You are able to switch between different operations, and you can weld both steel, stainless steel and aluminum.

Ook het vervaardigen van skids, pompsystemen, verdelers of koelers en heaters behoren tot de werkzaamheden. De te verwerken leidingmaten zijn meestal van dn10 tot dn400.

### What are you going to do?

- In accordance with safety, environmental and quality standards you carry out the welding work;
- You are responsible for performing various welding activities at our customers, mostly in the (petro) chemical industry
- The welding work usually takes place on location.

### What do you have?

- TIG, MIG-MAG welding certificate/-diploma;
- Experience with MIG/MAG of STT is an advantage;
- Experience with TIG and BMBE (coated electrode);
- Work experience within the petrochemical industry;
- Preferably a completed MBO training in metalworking or mechanical engineering;
- Experience with drawing reading;
- Flexible and a positive work attitude;
- You have thorough knowledge of various materials;
- you can work independently and you are quality conscious;
- Reliable, representative and you have good communicative skills;
- Minimum possession of Basic Safety VCA certificate;
- In possession of driving license B and own transportation;
- You master the Dutch language.

A pleasant working atmosphere within a healthy organization!
